

# SMART CONTRACT SECURITY AUDIT

---

WATCHTOWER

# DISCLAIMER

Watchtower has completed this report to provide a summary of the Smart Contract functions, and any security, dependency or cybersecurity vulnerabilities. This is often a constrained report on our discoveries based on our investigation and understanding of the current programming versions as at the date of this report. In order to understand the full scope of our analysis, it is vital for you to review the complete report. Although we have done our best in conducting our investigation and creating this report, it is vital to note that you should not depend on this report and cannot make any claim against Watchtower or its Subsidiaries and Team members on the premise of what has or has not been included in the report. Please remember to conduct your own independent examinations before making any investment choices. We do not provide investment advice or in any way claim to determine if the project will be successful or not.

**DISCLAIMER:** By perusing this report or any portion of it, you concur to the terms of this disclaimer. In the unlikely situation where you do not concur to the terms, you should immediately terminate reading this report, and erase and discard any and all duplicates of this report downloaded and/or printed by you. This report is given for data purposes as it were and on a non-reliance premise, and does not constitute speculation counsel. No one should have any right to depend on the report or its substance, and Watchtower and its members (including holding companies, shareholders, backups, representatives, chiefs, officers and other agents) Watchtower and its subsidiaries owe no obligation of care towards you or any other person, nor does Watchtower make any guarantee or representation to any individual on the precision or completeness of the report.

## ABOUT THE AUDITOR:

Watchtower is an Anti-Scam Token Utility which reviews Smart Contracts and Token information to Identify Rug Pull and Honey Pot scamming activity.

Watchtowers Development Team consists of a number of Smart Contract creators, Auditors Developers and Blockchain experts.

Watchtowers Website Scanner reviews a number of Risk factors to provide an adequate Risk summary of token projects.

In Addition to this the team also helps with Creation of Smart Contracts for legitimate projects, Audits and Promotion.

# OVERVIEW

**Watchtower was commissioned by SpaceShiba to complete a Smart Contract audit.**

**The objective of the Audit is to achieve the following:**

- Review the Project and experience and Development team
- Ensure that the Smart Contract functions are necessary and operate as intended.
- Identify any vulnerabilities in the Smart Contract code.

**DISCLAIMER:** This Audit is intended to inform about token Contract Risks, the result does not imply an endorsement or provide financial advice in any way, All investments are made at your own risk.

# Project Overview

## Project Details: (Website: <https://spaceshiba.co>)

Space Shiba is a game race universe filled with fascinating memes avatar, that players can collect as NFTs. Players aim to battle race, breed, collect, raise, and build kingdoms for their avatar. The game has a player-owned economy where players can truly own, buy, sell, and trade resources they earn in the game through skilled-gameplay and contributions to the ecosystem.

### Tokenomics:

Supply: 10,000,000 (10 Million)

5% Tax for Buys and 3% for Sells comprising of:

#### 5% BUY

- 2% Liquidity
- 1% BuyBack
- 1% Reflections
- 1% Marketing

#### 3% SELL

- 1% Liquidity
- 1% BuyBack
- 1% Marketing

### Team Review:

Watchtower reviewed a number of factors including the teams background and Cryptocurrency experience, social media interaction and availability, project momentum, token risks and community trust score.

The SpaceShiba team have a very good understanding of Cryptocurrency and are trying to utilise the blockchain and play to earn ecosystem to develop the games.

The SpaceShiba Social media groups are growing with over 4000 in their telegram currently.

### TEAM DOXXED/KYC:

The SpaceShiba team have been doxxed on their website however and have completed their KYC with Pinksale.

# CONTRACT FUNCTIONS DETAILS

## Functions (Public)

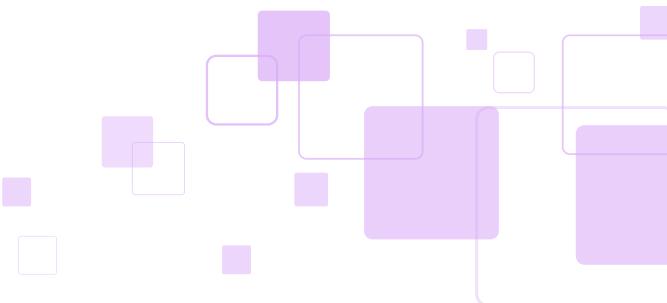

This contract has 24 available public functions which the owner can call.  
They can be viewed on BSC Scan.

### LINK:

<https://bscscan.com/address/0x0d152b87e948b47668a4aaebafcf88733076fbc5#writeContract>

### Function risks:

-No scam functions identified.

# Contract Stress Test

## Imported Libraries / Interfaces

- SafeMath
- IBEP20
- Auth
- IDEXFactory
- IDEXRouter
- IDividendDistributor

## Overview

|  |    |
|--|----|
| 1. ADDITION OF COMMENTS:                                 | 6  |
| 2. CALL STACK DEPTH ATTACK:                              | 10 |
| 3. TIME STAMP DEPENDENCY:                                | 10 |
| 4. PARTY MULTISIG BUG:                                   | 10 |
| 5. USE OF LIBRARIES/DEPENDENCIES (FROM TRUSTED SOURCES): | 7  |
| a. TRANSACTION-ORDERING DEPENDENCY:                      | 10 |
| 6. ACCESS CONTROL AND AUTHORIZATION:                     | 10 |
| 7. REENTRANCY ATTACKS:                                   | 10 |
| 8. ERC/BEP STANDARD VIOLATIONS:                          | 10 |
| 9. USAGE OF VISIBILITY LEVELS:                           | 10 |

# ISSUES CHECKING STATUS

| Issue description  | Checking status |
|--|-----------------|
| 1. Compiler errors.  | Passed          |
| 2. Race conditions and Reentrancy. Cross-function race conditions. | Passed          |
| 3. Possible delays in data delivery.                               | Passed          |
| 4. Oracle calls.   | Passed          |
| 5. Front running.  | Passed          |
| 6. Timestamp dependence.   | Passed          |
| 7. Integer Overflow and Underflow.                                 | Passed          |
| 8. DoS with Revert.  | Passed          |
| 9. DoS with block gas limit.                                       | Passed          |
| 10. Methods execution permissions.                                 | Passed          |

| Issue description  | Checking status |
|--|-----------------|
| 11. Economy model of the contract.                         | Passed          |
| 12. The impact of the exchange rate on the logic.          | Passed          |
| 13. Private user data leaks.                               | Passed          |
| 14. Malicious Event log.                                   | Passed          |
| 15. Scoping and Declarations.                              | Passed          |
| 16. Uninitialized storage pointers.                        | Passed          |
| 17. Arithmetic accuracy.                                   | Passed          |
| 18. Design Logic.  | Passed          |
| 19. Cross-function race conditions.                        | Passed          |
| 20. Safe Open Zeppelin contracts implementation and usage. | Passed          |
| 21. Fallback function security.                            | Passed          |

# SECURITY ISSUES

## High Severity Issues

Nil

## Medium Severity Issues

### Centralization Risk

- authorized addresses have the privilege to:
- set fees to 100 blocking all trades
- include / exclude from rewards
- include / exclude from fees
- include / exclude from transaction limit

## Low Severity Issues

- **Fees declared as private:** Private variables can't be viewed so users can't know the current fees values - It is advised to declare fees as public
- **High Gas Limit: distributorGas = 500000.** If BNBS price increases, then gas fees can be higher than rewards. It can however be adjusted by authorized users.

# CONCLUSION

**Watchtower reviewed SpaceShiba's deployed and verified contract to conduct this audit.**

**Watchtower is satisfied that the contract is void of any malicious coding and nil high severity issues.**
